

Abstract:

A MarkUp Abstract and a Substitute Abstract are enclosed herewith for Examiner's approval.
The two typographical errors noted by Examiner are corrected.

Claims, Status:

Original claims 1-20 are pending in this application.

Claims 1-20 are allowable over the prior art.

Claims 13, 18 and 20 were objected to due to typographical informalities.

Claims 8, 14, 18 and 19 were rejected under 35 USC 112.

Claims, Amendments:

Please amend the claims to read as follows:

A1 1 8. (Amended) The cremation casket of claim 1, wherein the lid is formed of four pieces: two
2 end pieces forming end walls of the lid, an insert piece, and a dome piece, said dome piece
3 arched over the insert and the two end pieces.

1 13. (Amended) A cremation casket formed of a plurality of foldable cardboard cut-outs,
2 comprising:
3 a tray cut-out having:
A2 4 a rectangular bottom panel having a front edge, a back edge, a left edge and a right
5 edge,
6 a back wall section foldably connected to and extending from the back edge of the
7 rectangular bottom panel, the back wall section having a rectangular back wall
8 panel and first and second trapezoidal side sections extending from two
9 opposite edges of the back wall panel,

10 a plurality of tabs extending outward from the back wall panel,
11 a front wall section foldably connected to and extending from the front edge of the
12 rectangular bottom panel, the front wall section having a central rectangular
13 front wall panel and first and second generally square side sections extending
14 from two opposite edges of the front wall panel,
15 first and second endwall sections foldably connected to and extending from the left
16 and right edges of the rectangular bottom panel, each endwall section having a
17 trapezoidal side panel adjacent the bottom panel, opposite the bottom panel and
18 foldably connected to the trapezoidal side panel is a top edge panel connected
19 thereto, a flap is foldably connected to the top edge panel,
20 a lid having:
21 an insert panel having a generally rectangular central section having a plurality of
22 slots located near the edges thereof, two stiffening panels located on opposite
23 sides of the central section and being configured to fold into a hollow tube and
24 two side sections located on opposite sides of the central section, a plurality of
25 tabs extending from each of the stiffening panels, the tabs sized and configured
26 to engage at least one of the plurality of slots,
27 a dome panel having a plurality of generally rectangular central sections separated by
28 fold lines, wherein, when the fold lines are folded at oblique angles, the dome
29 panel is formed into a generally dome shape, the dome panel having a plurality
30 of tabs foldably connected to and extending from ends of the rectangular central
31 sections and a plurality of slots located along the fold lines connecting the tabs
32 to the rectangular central sections,

33 two end wall panels having a plurality of tabs foldably connected to and extending
34 from the perimeter thereof, the plurality of tabs sized and configured to engage
A2 35 the slots in the dome section and in the insert panel.

1 14. (Amended) The cremation casket of claim 13, further comprising a plurality of tabs
2 extending outward from the front wall panel of said tray cut-out.

A3 1 18. (Amended) The cremation casket of claim 13, wherein the trapezoidal sections of the tray
2 cut-out cause the tray to have an angled back wall.

A4 1 20. (Amended) The cremation casket of claim 13, further comprising a headrest having:
2 a generally rectangular central section having a front edge, a back edge, a left edge and a
3 right edge,
4 a front wall foldably connected to and extending from the front edge of the central section,
5 a back wall foldably connected to and extending from the back edge of the central section,
6 and first and second side wall sections foldably connected to and extending from the left
7 and right edges of the central section.
